Connection Diagram:

Step 1
Products include screw sha�/cardan sha�,Cardan sha� base, Fixing Screws.

**Step 2**
Drill holes in advance at the outlet of the wall.

Step 3
Take out the base and put the sha� throughout the hole in the base.

Step 4
Connect the power supply PCB on the base with the outlet connector of power supply on the wall.

Step 5
If it is inconvenient for the power supply to go out from the wall, you can connect to power supply through the outlet port reserved on the side.

Step 6
Open the base plug, Take out the screw and fix it on the drilled wall. Repeat the opera�on on the other end.

Step 7
Use the tool to measure the distance between two walls.

Step 8
Cut the steel band based on the necessary length, and then s�ck and fix the light strip on it.

Step 9
Connect the screw to the steel belt with screws.

Step 10
First screw into the connec�on without power supply.

Step 11
When connected with one end of the power supply, Hold the screw and twist one end of the universal sha� to �ghten the steel belt.

Step 12
Plug the led strip connector into the female base connector, Take out the screw and fix it on the drilled wall. Repeat the opera�on on the other end.
